

B

B-Series (FRONT)

FEATURES

Powerful Category I 3-point Hitch

The 3-point hitch accepts a variety of implements for all of your different needs. The powerful hitch can handle rotary cutters, box blades, finishing mowers and more.

Gear-type Model

The B2320 is available as an HST model or an economical and reliable gear model, with 9 forward and 3 reverse speeds.

New 3-range HST

With an increased maximum speed and three range shift speeds (Hi/Med/Lo), the B2320/B2620/B2920 let you find the right speed to suit your task, for outstanding productivity. Our proven hydrostatic transmission provides the B-Series with smooth shifting and powerful performance for heavy-duty loader applications.

Engine

23HP/26HP/29HP liquid-cooled diesel engines, with Kubota's E-TVCS (three-vortex combustion system), offer tremendous power, high torque, cleaner emissions, and low noise and vibration.

Cruise Control

Kubota's cruise control allows you to set your preferred speed quickly and conveniently.

B

B-Series (FRONT)

FEATURES

Standard Loader Valve

Loader operations are more convenient with the standard-equipped 4-position valve and control lever. Integrated into the tractor, this ergonomically positioned valve lets you attach the front loader and other front implements quickly and easily. (B2320 available without valve.)

Hydraulic Pump

The 8.3 GPM hydraulic pump capacity provides exceptional efficiency and power for implement operations.

Large-capacity Radiator

The B-Series features a large-capacity radiator to keep the engine cool on a long, hot workday, and keep you on the job.

Long Wheel Base

With a formidable, 61.5 in. (1563 mm) wheel base, the B-Series delivers increased stability during operation.
