

Kubota

BX Sub-Compact Tractors **BX24**

FEATURES

LA240 FRONT LOADER

Take on jobs you never thought possible with Kubota's new, rugged and sleek LA240 front loader. Unlike many other tractors, the BX24 allows you to use it with both the mower (optional mower - models RCK54-23BX, RCK54P23BX, and RCK60B23BX) and the front loader attached. Switch from mowing, to lifting, to hauling and back to mowing easily and quickly - and without ever leaving you seat.

ROUNDED BOOM

The BX24's rounded boom perfectly complements the new overall tractor design. But its benefits don't end there. It also offers greater visibility

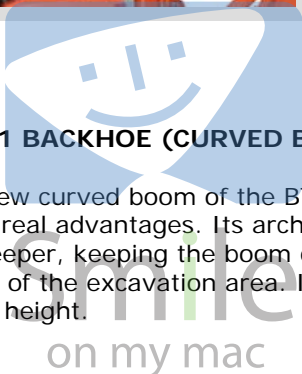

FOLDABLE ROPS

A foldable, quick-adjust Roll-Over Protective Structure comes standard on the BX24. Fold it from 180 degrees to 90 degrees without tools - perfect for passing under areas with height constraints.

BT601 BACKHOE (CURVED BOOM)

The new curved boom of the BT601 backhoe offers some real advantages. Its arched design allows you to dig deeper, keeping the boom out of the way of the edges of the excavation area. It also increases the lifting height.

FEATURES

LEVERS

For the first time, the BX24 comes with lever boot on the bottom part of the lever. This offers increased durability, and smoother operation.

PROTECTED HOSES

The hydraulic hoses have been tucked inside the backhoe boom. This improvement helps to increase the longevity of the hoses by protecting them from damage and the elements.

20 DEGREE ANGLE OF DEPARTURE

Kubota has increased the BX24's angle of departure to 20 degrees from 18 degrees on the BX23. This makes it easier to load the tractor onto trailers without removing the backhoe and it allows you to ascend steeper inclines.

EASY ATTACH/DETACH

The LA240 front loader has a new H-shaped stand, making it easier to attach and detach. This design also provides better protection for hoses when the stand is folded.

HOSE PROTECTION

For the new BX24, we've tucked the loader hoses inside the boom for greater protection and better visibility.

FRONT GUARD

A sturdy and distinctive front grill guard protects the front end, which has been rounded to match the new tractor design.

BX Sub-Compact Tractors **BX24**

FEATURES

REVERSIBLE HIGH-BACK SEAT WITH SEAT MOUNTED SEAT BELT

Switching from loader operation to backhoe operation is as simple as lift-and-spin. The BX24's seat easily shifts forward and back with just one touch.

CRUISE CONTROL

For carefree mowing of large spaces, set the BX24's cruise control to maintain a constant speed without keeping your foot on the forward pedal.

LOADER JOYSTICK LEVER

The simple movement of the single-joystick easily controls all front loader operations, including simultaneous operation of the boom and bucket.

FRONT IMPLEMENT 4-POSITION VALVE

A new feature on the BX24 tractor is our standard front implement 4-position valve (tractor can also be ordered without valve). Now part of the tractor, this valve provides you with the ability to quickly and easily attach the front loader and other front-mounted implements. Furthermore, the valve does not get in the way and gives the tractor a clean and sleek look.

SLANTED HOOD DESIGN

The new slanted hood and rounded design offer improved visibility for the operator and a sleek upscale look you'll be proud to show off in your garden or yard.

HALOGEN LIGHTS

The halogen headlights offer a clear bright light at dawn, dusk or dark of night. Furthermore, the casing and style has been newly redesigned, giving the tractor a sleeker look.

BX *Sub-Compact Tractors* **BX24**

FEATURES

2-PEDAL INLINE HST

When frequent changes in speed and direction are needed, the HST responds with its smooth operating forward and reverse pedals, leaving your hands free for steering and implement control. By splitting one pedal into two, operators are offered more foot room on the operator's platform.

HYDROSTATIC POWER STEERING

A standard feature, power steering makes steering practically effortless, reducing stress and operator fatigue.

TURF & R4 TIRES AVAILABLE

The BX24 is available with TURF or R4 tires.

HANDRAILS

The BX24 has handrails for operating and maneuvering easily.

EASY TO READ INSTRUMENT PANEL WITH DIGITAL TACHOMETER

The new BX24 features a digital tachometer that offers operators more precise monitoring on engine revolutions, especially when operating the PTO. When the engine is off, the digital tachometer displays the hour meter.

BX Sub-Compact Tractors **BX24**

FEATURES

LARGER OPERATOR'S PLATFORM

We've changed the pedal layout to increase operator comfort. We've split the forward and reverse HST pedals and moved the differential lock to the side of the seat. These changes give operators a larger deck area. Widened by four inches and lengthened by a full two inches, this wider step offers more foot room than prior BX models, eliminating the cramped feel of most garden tractors.

12 VOLT DC OUTLET

Charge your cell phone while you work. The standard DC outlet provides power on the go.

QUARTER-INCHING VALVE

With 1/4 inch adjustment increments at the lower link end, our quarter inching valve provides easier implement control. The lever guide's regulator allows smaller adjustments, which are often required when attaching/detaching 3-point mounted implements or when performing sensitive jobs.

CATEGORY I 3-POINT HITCH

Put your BX24 to work with its Category I 3-point hitch. This sturdy and technologically advanced hitch allows you to attach a wide array of full-fledged tractor implements.

CUP HOLDER

A convenient cup holder provides refreshment while you work.

FEATURES

DELUXE LEVER GUIDES

Stylish deluxe lever guides provide comfortable, easy control.

REAR DIFFERENTIAL LOCK

This feature contributes to more stable mowing operations by working to prevent slippage and skidding when working on wet grass.
