

KX Compact Excavators
KX91-3

FEATURES

CLEAN, EFFICIENT, POWERFUL KUBOTA DIESEL ENGINE

Kubota excavators feature proven Kubota diesel engines. Performance matched to each excavator, they provide dependable power at low sound levels with the highest fuel efficiency while meeting emissions standards. In cold weather, the super glow preheat system ensures engine starts as low as -20°C in 10 seconds! Easily accessible dual element air cleaners provide extra protection in the toughest conditions. And an electric fuel pump automatically bleeds the fuel lines should the fuel run out.

TWO-PIECE HOSE DESIGN

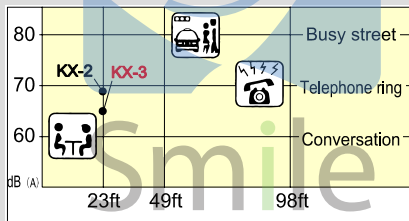

Two-piece hose connections for dozer and boom cylinder hoses allow for easy replacement and reduced downtime.

STRONGER BREAKOUT AND TRACTION FORCE

Break out of any rut with Kubota's innovative hydraulic setting. The KX91-3's bucket breakout and tracking force is the strongest in its class. And its unmatched power and efficiency make it ideal for trenching and dozer work.

TPSS (TWO PATTERN SELECTION SYSTEM)

Change between ISO and SAE operating patterns at the flick of a switch, without tools or getting out of the seat!

ULTRA LOW NOISE LEVEL

Low sound levels not only reduce operator fatigue, it is essential for work around hospitals and schools, or emergency nighttime repairs in residential areas.

FEATURES

EASY MAINTENANCE

Ground level opening provide easy access to daily maintenance items. Open the left side engine cover to access the fuel/water separator and fuel filter, or to clean the radiator. Open the right side cover to the first stop for easy access to the hydraulic tank and control valve. For additional hydraulic component access, simply remove the stop pin and the cover is easily removed. For the ultimate in accessibility, all the access panels can be removed with standard tools in under ten minutes.

PROTECTED CYLINDER HOSES

Bucket cylinder hoses are plumbed inside the arm. And boom cylinder hoses are routed under the boom bottom.

ROPS/FOPS CANOPY AND CAB MODELS

Power and performance assured, the KX91-3 also provides an extra margin of safety. All canopies and cabs include OSHA certified ROPS/FOPS protection.

WIDE WORKING RANGE

The KX91-3's powerful and durable long arm comes standard. Responsive digging, lifting and loading can be achieved without repositioning the machine quite as often, for increased operation efficiency.

LARGE OPERATING SPACE WITH SUSPENSION SEAT

This roomy compact lets you work all day in comfort. It offers a more spacious and comfortable operator's space than standard tail swing machines. Plus, the full-featured suspension seat is adjustable six ways and comes standard with arm rests, high seat back and adjustable height and spring firmness, to further reduce operator fatigue.

AUXILIARY HYDRAULICS STANDARD EQUIPMENT

Includes bi-directional auxiliary hydraulic controls. Piping routed to arm. Short hoses to the tool less likely to catch on sharp edges.
