

Lawn Tractors

T1570/T1670/T1770/T1870

FEATURES

ONE-STEP PARKING BRAKE

With this feature, parking is accomplished quickly, easily, and safely. To activate the parking brake, simply depress the parking brake pedal firmly.

HIGH POWERED OHV GASOLINE ENGINE

OHV gasoline engines provide high torque rise, super combustion capability, and exceptional fuel economy for remarkable work efficiency during extended operation. In fact, the overhead valve design provides 30% more output while using 25% less fuel than comparable side valve engines. Further, the new engine design reduce noise and vibration.

SMOOTH HYDROSTATIC TRANSMISSION

The hydrostatic transmission (HST) simplifies total tractor operation. A single pedal controls both speed and direction, without shifting or clutching. This system keeps the user's hands free for precise steering at all times, which is especially helpful when working in tight spaces.

FENDER SUSPENSION "CUSHION RIDE" SYSTEM*

Kubota's "Cushion Ride" Suspension System, located in the tractor fender, is yet another industry first. This design utilizes two spring-loaded shocks connected to the flat deck, which allows it to float freely — providing a smooth, comfortable ride.

*Not available with the T1570

SIMPLE DIAL-TYPE CUTTING ADJUSTMENT

Adjusting the mower deck's cutting height is easy with Kubota's simple dial-type design. All it takes is one convenient turn of the control knob from the operator's seat.

HIGH FUNCTIONAL MULCHING KIT

For users requiring a cleaner, more even cut, Kubota offers the dependable 40" mulching kit. This quick and easy attach/detach mulcher disperses clippings directly into the grass for a more unified cut.

Lawn Tractors

T1570/T1670/T1770/T1870

FEATURES

FULL FLAT OPERATOR'S DECK

The T-Series features a full-flat operator's deck. The increased floor space with ample legroom increases user comfort as well as simplifies tractor entry and exit.

LARGE FUEL TANK

The T-Series fuel tanks hold a full 2.9g./11L(T1570) or a new larger 4.0g./15L (T1670, T1770 and T1870). With this expanded fuel tank capacity, refueling is kept to a minimum when mowing for extended time periods.

EASY-ADJUST HIGH-BACK SEAT*

The deluxe high-back seat adjusts easily to accommodate the operator and reduce fatigue. Just one touch of the lever, disengages the lock to reposition/reverse the seat to suit your chore and comfort level.

*Not available with the T1570

KRA (Kubota Reverse Awareness) SYSTEM

The tractor is equipped with a Kubota Reverse Awareness System to prevent the operator from attempting to mow in reverse. However, the operator may choose to override the system by depressing an override switch. A flashing warning light reminds the operator that the mow in reverse feature has been selected.

MID-MOUNT MOWER DECKS

Kubota's mid-mount mower decks with contoured deep deck designs, give you powerful two-blade cutting action on the 40" deck, or three-blade action on the 44" and 48" decks.

CONTOURED DEEP-DECK DESIGN

You get the cleanest cut possible with Kubota's contoured deep-deck design. Even tall, dense grass requires only a single cutting pass. Additionally, the gas-spring assisted deck levers allow the deck to be lifted/lowered with ease, while the gauge wheels reduce turf damage.
