

ZG Zero-Turn Mowers ZG20/ZG23

FEATURES

ROLL OVER PROTECTIVE STRUCTURE (ROPS)

A quick-adjusting, foldable Roll-Over Protective Structure comes standard. It may be folded from 180° to 90° without tools, and allows you to pass under areas with height constraints. It's the perfect size for easy garage storage.

DELUXE SEAT

Designed to offer maximum support and comfort. You'll work longer and with less fatigue when riding on our deluxe seat with padded armrests.

CUP HOLDER

Whether it's a hot cup of coffee or an ice-cold beverage, the essential cup holder lets you bring either one.

HYDRAULIC LIFT AND CUTTING HEIGHT ADJUSTMENT DIAL

The mid-mount mower is easily raised and lowered hydraulically, while cutting height is adjusted quickly with just a twist of the height adjustment dial. Both controls are within easy reach from the driver's seat.

TILT-UP MECHANISM

When it comes to routine maintenance, you'll do it faster and with no strain or hassle with the ZG's built-in mower lift. Simply turn the crank and watch the front-end lift up. For safety, the crank won't turn unless the parking brake has been activated.

10 GAUGE HEAVY DUTY DECK

Ideal for heavy-duty operation, the 48" (ZG20) and 54" (ZG23) mower decks with a 5" deep deck design, produce a professional cut and discharge.

ZG Zero-Turn Mowers ZG20/ZG23

FEATURES

EASY TO ATTACH/DETACH MULCHING KIT

Our easy-to-attach/detach Mulching System produces mulch that falls between blades of standing grass, leaving an immaculate finish.

TRANSMISSION

Superior durability of the entire driveline was of utmost importance when we decided to incorporate an integral-type, twin hydrostatic transmission as part of the ZG-Series. The hermetically sealed structure (hydrostat and final drive) requires no maintenance except for an occasional fluid change. And no belt replacement is necessary.

SAFETY START SYSTEM

With operator safety in mind, we've designed a safety start system that will only allow the engine to be started when the operator is seated, the parking brake engaged, the PTO is in neutral and the neutral lock is engaged. If, at any time while the engine is running you leave your seat, the engine will automatically shut down. So when the unexpected happens, you'll be protected.

EASY ACCESS CONTROL PANEL

For convenience, the operator's control panel with throttle, PTO lever, fuel gauge, hour meter, and start switch are all located to the right of the operator, within easy reach.

ENGINE

The Kubota ZG zero-turn mower is equipped with a reliable, smooth-running engine that's been robustly crafted to meet commercial standards. The gas-powered engine utilizes a V-twin design, an efficient outside air intake system, and offers you a choice of 20 or 23 horsepower output.

ZG *Zero-Turn Mowers* ZG20/ZG23

FEATURES

FULL OPEN HOOD

For enhanced maintenance, the full-open hood provides easier access to the engine and its vital components.

PTO CLUTCH

To reduce down time, the ZD-Series is equipped with a wear-resistant, wet-type, multi-disk PTO clutch that allows you to work longer, but not harder. With unsurpassed durability, it will smoothly transfer power with absolute efficiency. For safety, the PTO clutch is also equipped with an internal brake, which can stop the mower blades just seconds after disengagement.
